SOURCE

The newly built seagoing dredge WARNEUENDE was transferred from East Germany to Stralsund via Stettin. This dredge, which had an hourly capacity of 300 cubic meters, was to be completed in Stralsund and, afterwards, was scheduled to be employed for dredging operations in the Jasmunder Bodden. Six other WARNEUENDE type seagoing dredges were scheduled to be built in 1953. Four were destined for the USSR, one for Rumania and one for East Germany.
